# Let's go step by step

1

## 01 Preparation is crucial

The first two days, the doors are removed, cleaned and prepped for Spraying. These are the most visible parts of your kitchen and deserve significant attention to give it a perfect finish.

2

## 02 Respraying the frame

Generally, on the third day, the frame of the cabinets is cleaned, sanded, and prepared for repainting. Meaning there is as little downtime as possible for you and your family.

3

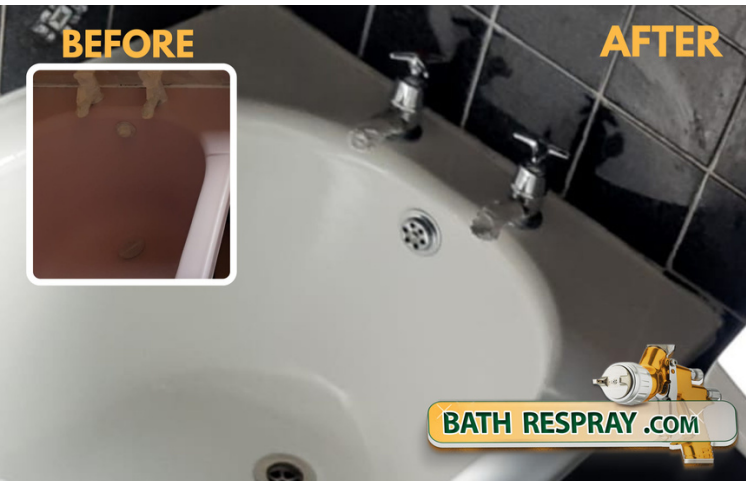

## 03 Almost Done

On the final day, the doors are refitted. When needed, new handles will be refitted. We can fill and reset any shape or size.

Our exclusive paint is specifically designed for this type of work. It has an ultra-smooth finish and is excellent for easy cleanup and maintenance.

# BathRenovation

Want your bathroom to look like new again?  
We've got a few options for you!

## Resurface your bath

We have been resurfacing baths since 1999. Our system is like no other; we are the only company in Ireland to offer a lifetime colour warranty. Save time, money and carbon footprint by resurfacing!

## Repair your bath

Repairing your bath can make a lot of sense. Every day we fix baths that have been cracked and damaged. Standard repairs take about an hour and are invisible when complete.

## Respray your shower tray

It makes sense to reglaze your shower tray rather than replace it. Considering all the other work involved, you can save up to 80% of the replacement cost.

We use a resurfacing technique exclusive to ourselves to provide the most excellent and long-lasting results for our customers. It is commercial-grade enamel that is extremely durable and guaranteed to last a long time.

# PVC Respray

## Windows & Doors

Rather than replacing. You can save over 50% by resurfacing your existing PVC window frames and doors. There is also a significant saving in associated expenses like repainting new plaster and making good window sills etc.

Our service is guaranteed. We are Ireland's approved applicators for PVC respray. The products do not just sit on the surface. No. They chemically bond to the surface, providing the look and feel of a factory finish.

We can respray your front door and windows inside and out to any colour you choose. With wear and tear, PVC windows can look a little tired. Now with uPVC respray, you can either completely change the colour to a fashionable green or grey or redo them in factory white.

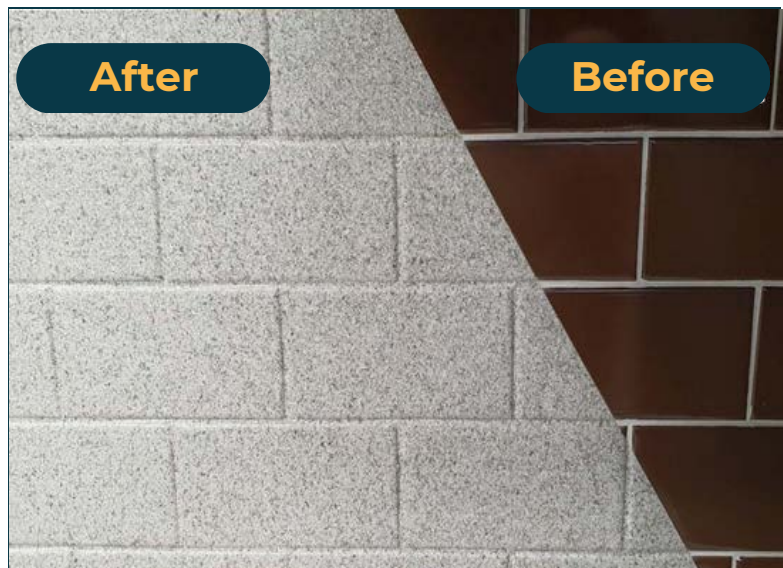

# Worktop & Tiles Respray |

Say goodbye to Tilers, plumbers, gas engineers and carpenters and save money in the process.

At All Surface Respray, we only use the best. Over the years, we have tweaked our formulas and systems to deliver the country's best and most durable countertop resurfacing procedure.

Sometimes it's just a chip or a burn that needs to be repaired. Everyday landlords commercial premises and domestic home-owners choose to repair instead of replace.

Save all the hassle of breaking tiles, disconnecting your gas cooker and disconnecting your water when you choose to respray rather than replace.
